WATCH OVER

Would you rather someone always watch you, or *watch over* you?

Chhavi & Abhay · Phasor°

PROBLEM

NO ONE IS LOOKING

Falls *kill* 842,000 people a year

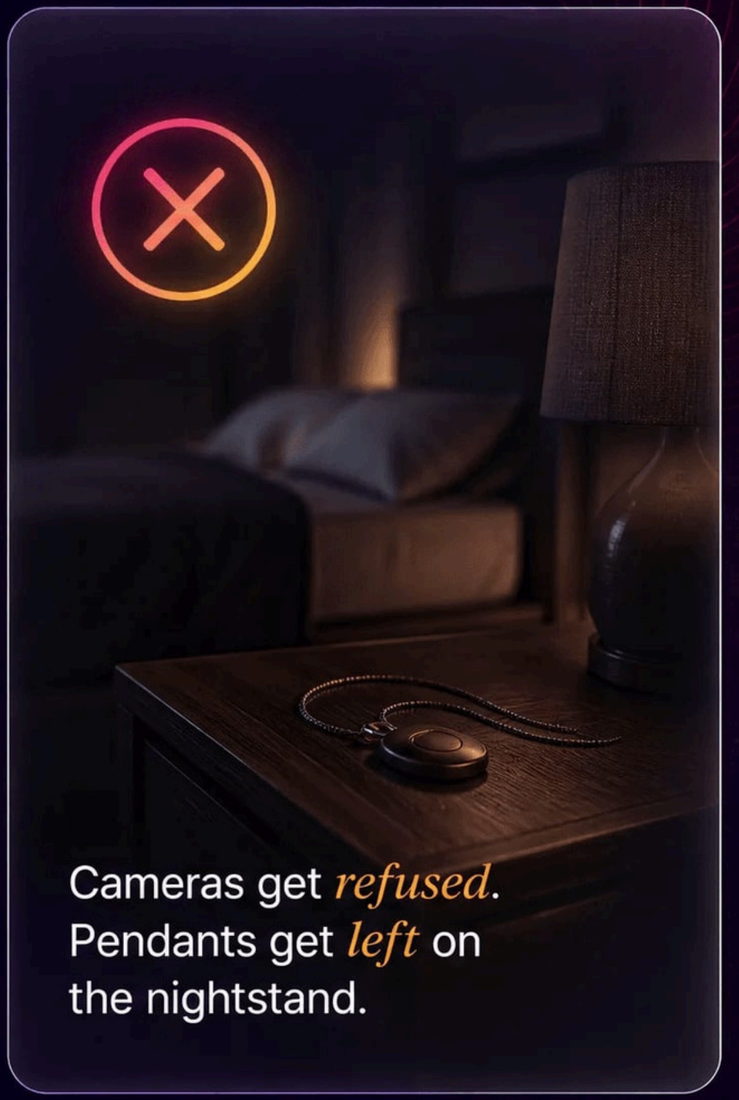

842,000

Falls are the second-leading cause of unintentional injury death worldwide, and about *71%* of those deaths are people aged 60 or older.

842,000 deaths in 2023

71% aged 60+

Fast response *saves lives*

Cameras get *refused*. Pendants get *left* on the nightstand.

Source: WHO Falls fact sheet, 2023.

A bottom-up market, *starting* in Dubai

Start narrow and reachable. Expand from there.

India next

60+ population grows from **149M** (2022) to **347M** by 2050

01 TAM

~86,000

Dubai residents aged 65+ (about 4.8M residents × 1.8%)

02 SAM

~50,000

Dubai households with a 65+ parent who could buy (Phasor estimate)

03 SOM

500 → 3,000

Households, Year 1 → Year 3 (1% → 6% of SAM)

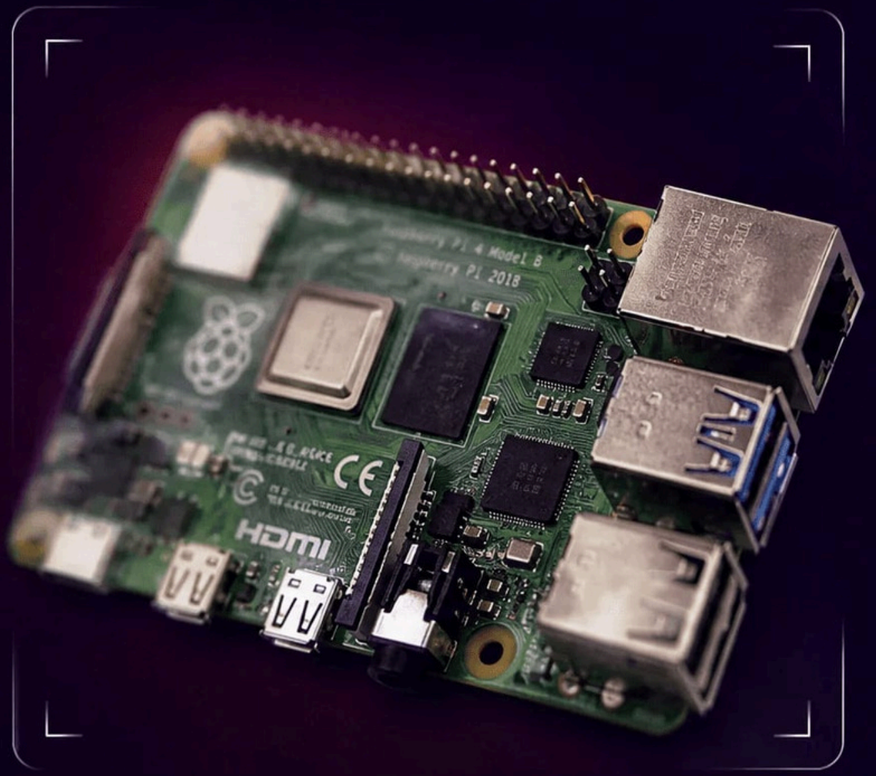

SOURCE: Dubai Data and Statistics Establishment (Sept 2026); UN WPP (65+ share, UAE-wide); UNFPA India Ageing Report 2023; Phasor model.

PRODUCT. PATTERN D GRID.

Sensing through *air*

Phasor reads how a person's movement changes WiFi signals in a room, called **Channel State Information**.

No camera. · No microphone. · **Nothing** to wear.

01
WIFI SIGNAL (CSI)

02
RASPBERRY PI 4B

03
NEXMON_CSI CAPTURE

04
ALERT TO FAMILY

Person moves > signal changes > Pi detects > family alerted

Private, wearable-free care *built* for remote families

	Cameras	Wearables	mmWave radar	WiFi sensing (Origin/ADT)	Phasor
Privacy	L	L	M	M	H
Worn	No	Yes	No	No	No
Hardware	Camera per room	Device per person	Sensor per room	Provider-supplied	One low-cost node + router
Fall detection	Yes video	Yes if worn	Yes Vayyar	Yes commercial	In development
Maturity	Mature	Mature	Commercial	Acquired by ADT $170M 2026	Prototype
Sold to	Households	Individuals	Smart-home/care operators	ISPs/security	Families directly

Target first-year cost: **Phasor AED 519** vs about AED 1,540–2,430 (medical alert) and AED 3,500–3,650 (Vayyar Care, 3 rooms).

ADT paid $170M for WiFi sensing in 2026. The category is real. Our wedge is direct-to-family care in Dubai, then India.

Validation.

Real rooms. Real results. *Motion detection* first.

Detection results

94.7%	95.3%	95.8%
Recall	F1 score	Precision

Precision = 1,946 / (1,946 + 86). Recall = 1,946 / (1,946 + 108).
Motion and walking detection only. Fall dataset in progress. Formal fall validation: Q1 2027.

Falls are the *next* milestone

01 DETECT

In development

Learn signature of a sudden fall

02 ALERT

In development

Notify caregiver after no-motion window ends

03 ACT

Planned

Family checks in or calls emergency

Target: < 1 false alarm per home per week

Hardware at launch, *recurring* revenue after.

AED 99 Kit
One-time. Hardware cost AED 350, subsidy AED 251.

AED 35 /month Care subscription
Alerts, app and caregiver sharing.

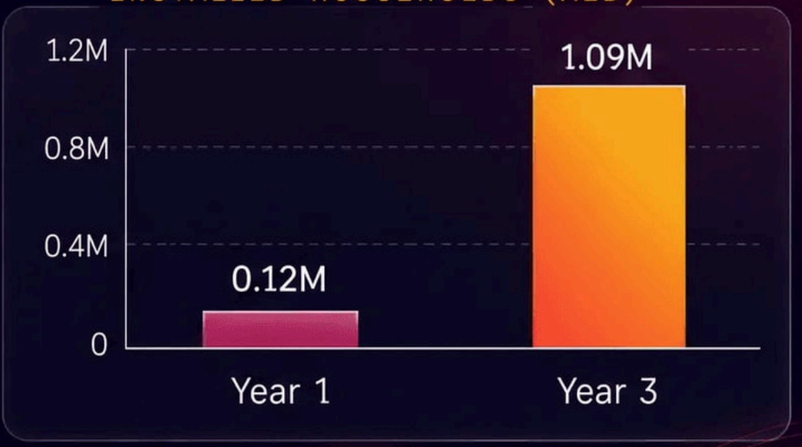

~18 months
Payback per household, including acquisition cost.

UNIT ECONOMICS

Hardware cost	CAC target	Subscription margin	Churn	Lifetime
AED 350	AED 185	~70%	~3% / month	~33 months

Upfront per household AED 436 (350 − 99 + 185) · Lifetime revenue AED 1,254 · Contribution about +AED 370 · LTV:CAC about 3.

INSTALLED HOUSEHOLDS (AED)

Assumptions: 500 installed households in Year 1, 3,000 in Year 3; subscription AED 420/year; 70% margin after cloud, SMS and support. Planned pricing.

Earn *trust* in Dubai, then take it to India

PATTERN E 5-STEP TRUST LOOP

Validate
Prove reliability in real-world use

Acquire
Win early adopters with intent

Convert
Turn intent into recurring usage

Respond
Deliver care that builds confidence

Expand
Grow usage, earn referrals

Phase 1:

Dubai (2027)

Prove. Perfect. Build trust.

Phase 2:

India (2028)

Scale. Localize. Lead.

Risks.

Real risks, *each with a plan.*

Risk	How we handle it
False alarms (no-motion window)	Tune sensitivity, staged alerts, user feedback loop
Range (one node per area)	Coverage mapping, multi-node for large homes
Incumbent entry (Direct-to-family brand)	Deep local trust, community, rapid iteration
Privacy (No images)	No images, local processing, encrypted data
Regulation	Notification-only aid, confirmation with advisor
Unit cost	Subsidy + subscription

Positioned as a notification-only safety aid. *Classification review before any medical claim.*
